The Profurl System is now supported by Wichard from their USA office and stocked by Sailing Services, Inc., in Miami for immediate shipping.

Basic models are NC (normal capacity drum) and LC (large capacity drum), with different diameter foils. The NC32 has a foil diameter of 32mm while the NC42 foil has a foil diameter of 42mm. The larger capacity drum has a longer standard foil pack set. The "I" in the suffix denotes an integrated cylinder that will accept most turnbuckle bodies. Check your turnbuckle body to insure that it will pass into the Profurl "I" system of your choice. An extra foil can be ordered to extend the standard foil pack for longer overall foil length requirements.

Compare the Basic, Classic, and Elite systems on-line. Profurl also has electric and hydraulic furling units and In-Boom reefing systems and the NEC - continuous line furling - for flying sails. Extensive information and specifications are available on the Profurl web site, www.profurl.com.

When ordering a new Profurl system, it is a very good idea to renew the headstay and terminals to insure long and carefree use. We stock the wire, rod, and end terminals to meet your needs, including the turnbuckle body and stud, threaded eye, and double jaw toggle to match up with the Profurl connection pieces for full toggling action at the deck below the drum.

Call on us for expert advice on Profurl and other high quality systems.

Lewmar Rope Clutches

Description	Single Clutch Part Number	Single Clutch Price	Double Clutch Part Number	Double Clutch Price	Triple Clutch Part Number	Triple Clutch Price
